# Update and plans for HAFS physics tests 

- Code changes
- Test plans

## EMC hurricane team <br> 2019/07/10

- FV3 physics code changes

Observation-based surface drag coefficients over ocean through introducing roughness length formulations (sfc_diff.f)

Observation-based K adjustment under strong wind conditions over ocean (moninedmf.f)

Namelist control (sfc_z0_type $=6$, moninq_fac $=$ -1.0 , recommend to use together )

- Commit to FV3 master on 2019/07/19 after regression tests

## $\mathrm{C}_{\mathrm{d}}$ vs wind at 10 m

At 10 m
$C_{d}=f\left(u, z_{0}, L\right)$
Symbols: obs

Black line:<br>Fv3gfs

Blue/red/pink lines:
HWRF/HMON

Only over ocean
$\square$ Maximum K @500m capped by wind/0.6
$\square$ Adjustment mostly under strong wind conditions

# Surface Wind at 72 hr (just before Michael landfall) Initialized at 2018100712

## HAFS Phys test plan

Goal: build a suite (under CCPP) best to FV3-hurricane.

1. Short term ( June, 2019 to Dec, 2019, Jet and Wcoss)

Test schemes ( 4 configurations):
Control: GFS modified-sfc, modified-HEDMF, GFDL-MP, saSAS, NOAH, RRTMG
PBL test: Control + YSU PBL (possibly with YSU-sfc) Control + SATEDMF
CU test: Control + global: on, regional off
MP test: Control + Thompson
Control + wsm6

## Test Periods

## 2. Long term (2020)

2.1 Test existing CCPP suites

There are five physics suites available for TC forecasts in FV3

| Scheme/Suites | GFS_v15 | GFS_v15+ | CPT_v0 | GSD_v0 | HWRF_v0 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Microphyscis | GFDL-MP | GFDL-MP | M-G3 | Thompson | Ferrier-Aligo |
| PBL | HEDMF | SATEDMF | HEDMF | saMYNN | HEDMF+a |
| Surface Layer | GFS | GFS | GFS | GFS | GFDL-SF |
| Deep conv | saSAS | saSAS | CS | Grell-Freitas | saSAS |
| Shallow conv | saSAS | saSAS | saSAS | saMYNN | saSAS |
| Land Surface | NOAH | NOAH | NOAH | NOAH | NOAH |
| Radiation | RRTMG | RRTMG | RRTMG | RRTMG | RRTMG |

2.2 Test one optimized suite

If none of the above five suites are satisfactory, we will build a new suite which combines different schemes based on all tests.
