

**64th Interdepartmental Hurricane Conference., March 1-4, 2010, Savannah GA.**

Bao, J.-W., S. G. Gopalakrishnan, S. A. Michelson: Sensitivity of the WRF-NMM model to physics parameterizations at various vertical and horizontal resolutions.

Black, M. L., C. Martin, P. Flaherty, J. Almeida, and J. Latham., 2010: *Progress and plans for the development of a unified dropsonde quality assurance and visualization capability.*

Brown, B., L. Nance, T. Jensen, and C. Williams: *The Tropical Cyclone Modeling Testbed (TCMT) and its role in the Hurricane Forecast Improvement Project (HFIP).*

Carswell, J., D. Robinson, P. Chang, and E. Uhlhorn., 2010: *Validation and processing tools for the Air Force Reserve Command 53<sup>rd</sup> Weather Reconnaissance Squadron WC-130J multi-aircraft SFMR systems.*

DeMaria, M., J. A. Knaff, A. B. Schumacher, J. Kaplan, D. P. Brown, G. M. Gallina, and J. P. Kossin., 2010: *Improved GOES utilization for tropical cyclone forecasting.*

Dunion, J. P., C. Velden, and J. Hawkins., 2010: *Arc clouds in the tropical cyclone environment.*

Fiorino, M., M., J. Whitaker, T. Hamill, 2010: *The Potential for Improved Tropical Cyclone Forecasts from High-Resolution Global Models --Results from the HFIP 2009 Summer Experiment NOAA Earth System Research Laboratory, Boulder CO.*

Fiorino, M., J. –W. Bao, 2010: *Over-forecasts of tropical cyclogenesis in the FIM global model.*

Gamache, J. F. 2010: *Airborne Doppler analysis, quality control, and transmission in 2009 and 2010*

Gamache, J., P. Dodge, F. Marks, F. Zhang, and Y. Weng., 2010: *Transmission of airborne Doppler data and analyses to the ground from the NOAA WP-3D aircraft during the 2008 hurricane season: Quality control, analysis, and superobs.*

Ginis, I., Y. Fan, T. Hara, B. Thomas, M. Bender, J.-W. Bao, C. Fairall, and L. Bianco, 2010: *Coupled atmosphere-wave-ocean strategies for tropical cyclone modeling and prediction.*

Goerss, J., 2010: *Impact of New Global Models and Ensemble Prediction Systems on Consensus TC Track Forecasts*

Goldstein, A. S., and E. Uhlhorn., 2010: *First results from a high altitude stepped frequency microwave radiometer.*

Goldstein, A. S., J. Talbot, E. Uhlhorn, and I Popstefanija, 2010: *Differences in stepped frequency microwave radiometer measurements – Resolutions and remaining issues.*

Gopalakrishnan, S. G., X. Zhang, K. Yeh, R. Rogers, J.-W. Bao, F. Marks, S. Aberson, and R. Atlas., 2010: *The Hurricane Research System: Development of a high resolution, non-hydrostatic model for addressing the need for the next generation of improved tropical cyclone intensity prediction.*

Halliwell, G. R., D. Willey, J. Brewster, B. Jaimes, L. K. Shay, and R. Atlas, 2010: *The potential role of ocean observing system simulation experiments for improving ocean model initialization in coupled hurricane forecast models.*

Hodur, R.M., S. Chen, J. Cummings, J. Doyle, T. Holt, H. Jin, Y. Jin, C.-S. Liou, K. Sashegyi, J. Schmidt, 2010: *Application of COAMPS-TC to the Hurricane Forecast Improvement Project (HFIP)*

Hood, R., R., Atlas, F. Marks, R. Rogers, J. Cione, M. Black, E. Uhlhorn, C. Landsea, G. Wick, N. Prive. S. Mackaro, Y. Xie, P. Hall, N. Ash, and P. Eastman, 2010: *NOAA assessment of unmanned aircraft systems for hurricane observations.*

Jiang, H., E. J. Zipser, J. B. Halverson, and R. Rogers., 2010: *Use of total precipitable water to aid hurricane landfall prediction.*

Kaplan, J., J. Cione, M. DeMaria, J. Knaff, J. Dunion, J. Solbrig, J. Hawkins, T. Lee, E. Kalina', J. Zhang, J. Dostalek, and P. Leighton., 2010: *Enhancements to the operational SHIPS Rapid Intensification Index.*

Katzberg, S. J., and J. Dunion, 2010: *Use of reflected GPS to map wind fields for hurricane genesis applications.*

Kim, H.-S., D. Iredell, C. Lozano, and the HWRF Team, 2010: *Coupled HWRF-HYCOM Parallel Run Results for the 2009 Hurricane Season.*

Kwon, Y., R. Tuleya, H.-L. Pan, V. Tallapragada, W. Lapenta, and S. Lord, 2010: *Implementation of the new air-sea exchange coefficients (Cd/Ch) to the operational HWRF model and their impact on hurricane intensity forecast skill.*

Laupattarakasem, P., W. L. Jones, P. Change, Z. Jelenak, and E. Uhlhorn, 2010: *Improved near real-time hurricane ocean vector winds retrievals for QuikSCAT.*

Lee, S.-K., C. Wang, C. Lozano, and D. Iredell, 2010: *Simulation of Atlantic warm pool in the Hybrid-Coordinate Ocean Model (HYCOM).*

Majumdar, S., S. Aberson, P. Harr, S. Jones, R. Langland, T. Nakazawa, M. Peng, C. Reynolds, D. Richardson, C. Velden, M. Weissmann, C.-C. Wu, and M. Yamaguchi.,

2010: *Coordinated use of targeted observations to improve tropical cyclone track forecasts.*

Marks, F., S. Gopalakrishnan, X. Zhang, T. Quirino, R. Rogers, and K. Yeh, 2010: *The HWRF modeling system: Recent developments in hurricane structure and intensity forecasting research at AOML.*

Miller, T. L., E. Uhlhorn, R. Amarin, R. Atlas, P. Black, W. Jones, C. Ruf, 2010: *Development, capabilities, and impact on wind analyses of the Hurricane Imaging Radiometer (HIRAD).*

Miller, T., R. Atlas, M. C. Bailey, P. Black, S. El-Nimri, R. Hood, M. James, J. Johnson, L. Jones, C. Ruf, and E. Uhlhorn., 2010: *Surface wind vector and rain rate observation capability of the future Hurricane Imaging Radiometer (HIRAD).*

Nolan, D. A., J. A. Zhang, and D. P. Stern., 2010: *Evaluation of planetary boundary layer parameterizations in tropical cyclones by comparison of in-situ observations and high-resolution simulations of Hurricane Isabel (2003).*

Rogers, R., 2010: *Identifying tropical cyclone research needs.*

Rogers, R. IFEX 2010, 2010: *NOAA's plans for Hurricane field Program operations for the 2010 season.*

Rogers, R., S. Gopalakrishnan, K. Yeh, and X. Zhang., 2010: *Impact of horizontal resolution on rapid intensity change forecasts using the Hurricane Research System.*

Schroeder, J., M. Biggerstaff, D. Cecil, K. Gurley, A. Kennedy, M. Levitan, F. Masters, M. Powell, and J. Wurman., 2010: *The Digital Hurricane Consortium.*

Shay, L. K., G. Halliwell, J. Brewster, B. Jaimes, and W. Teague, 2010: *Evaluation and improvement of ocean model parameterizations for NCEP operations.*

Shay, L. K., E. Uhlhorn, R. Lumpkin, P. Meyers, B. Jaimes, J. Brewster, and G. Halliwell., 2010: *Evolving oceanic and atmospheric boundary layer measurements during Hurricanes Gustav and Ike.*

Piñeros, M.F., J. S. Tyo, Elizabeth A. Ritchie , and S. Galvin, 2010: *Detecting Tropical Cyclone Formation from Satellite Infrared Imagery*

Tallapragada, V., W. Lapenta, S.J. Lord, N. Surgi, Q. Liu, Y. Kwon, Z. Zhang, R. Tuleya, J. O'Connor and S. Trahan, 2010: *Performance of the Operational HWRF Model for 2009 Hurricane Season and Suggested Upgrades for 2010 implementation.*

Tuleya, R.E., Y. Kwon, [V. Tallapragada](#), Z. Zhang, Y. Wu, Q. Liu, J. O'Connor

and B. Lapenta, 2010: *Impacts of Land Effects and Improvements in Modeling Landfall Using HWRP*.

Uhlhorn, E., R. Atlas, P. Black, C. Buckley, S. Chen, S. El-Nimri, R. Hood, J. Johnson, L. Jones, T. Miller, and C. Ruf., 2010: *Simulation of the impact of new aircraft- and satellite-based ocean surface wind measurements on estimates of hurricane intensity*.

Uhlhorn, E., F. Marks, J. Gamache, S. Aberson and J. Dunion., 2010: *Review of NOAA Intensity Forecasting Experiment (IFEX) 2008 Accomplishments and preliminary plans for 2009*.

Whitaker, J., T. Hamill, S. Benjamin and M. Fiorino, 2010: High-resolution global ensemble hurricane forecasts using an experimental ensemble Kalman filter based analysis and prediction system.

Yablonsky, R. M., I. Ginis, B. Thomas, J. J. Cione, G. R. Halliwell, E. W. Uhlhorn, H.-S. Kim, C. Lozano, E. P. Chassignet, and H. R. Winterbottom, 2010. *Validating the ocean model component of coupled hurricane-ocean models*.

Yablonsky, R. M., I. Ginis, B. Thomas, J. Cione, G. Halliwell, E. Uhlhorn, H. Kim, C. Lozano, E. Chassignet, and H. Winterbottom, 2010: *Validating the ocean model component of coupled hurricane-ocean models*.
