

Ensemble Products Tiger Team Update

Ryan D. Torn, Univ. Albany, Team Co-Lead

Mark DeMaria, NHC, Co-Lead

Paul Kucera & DTC Team

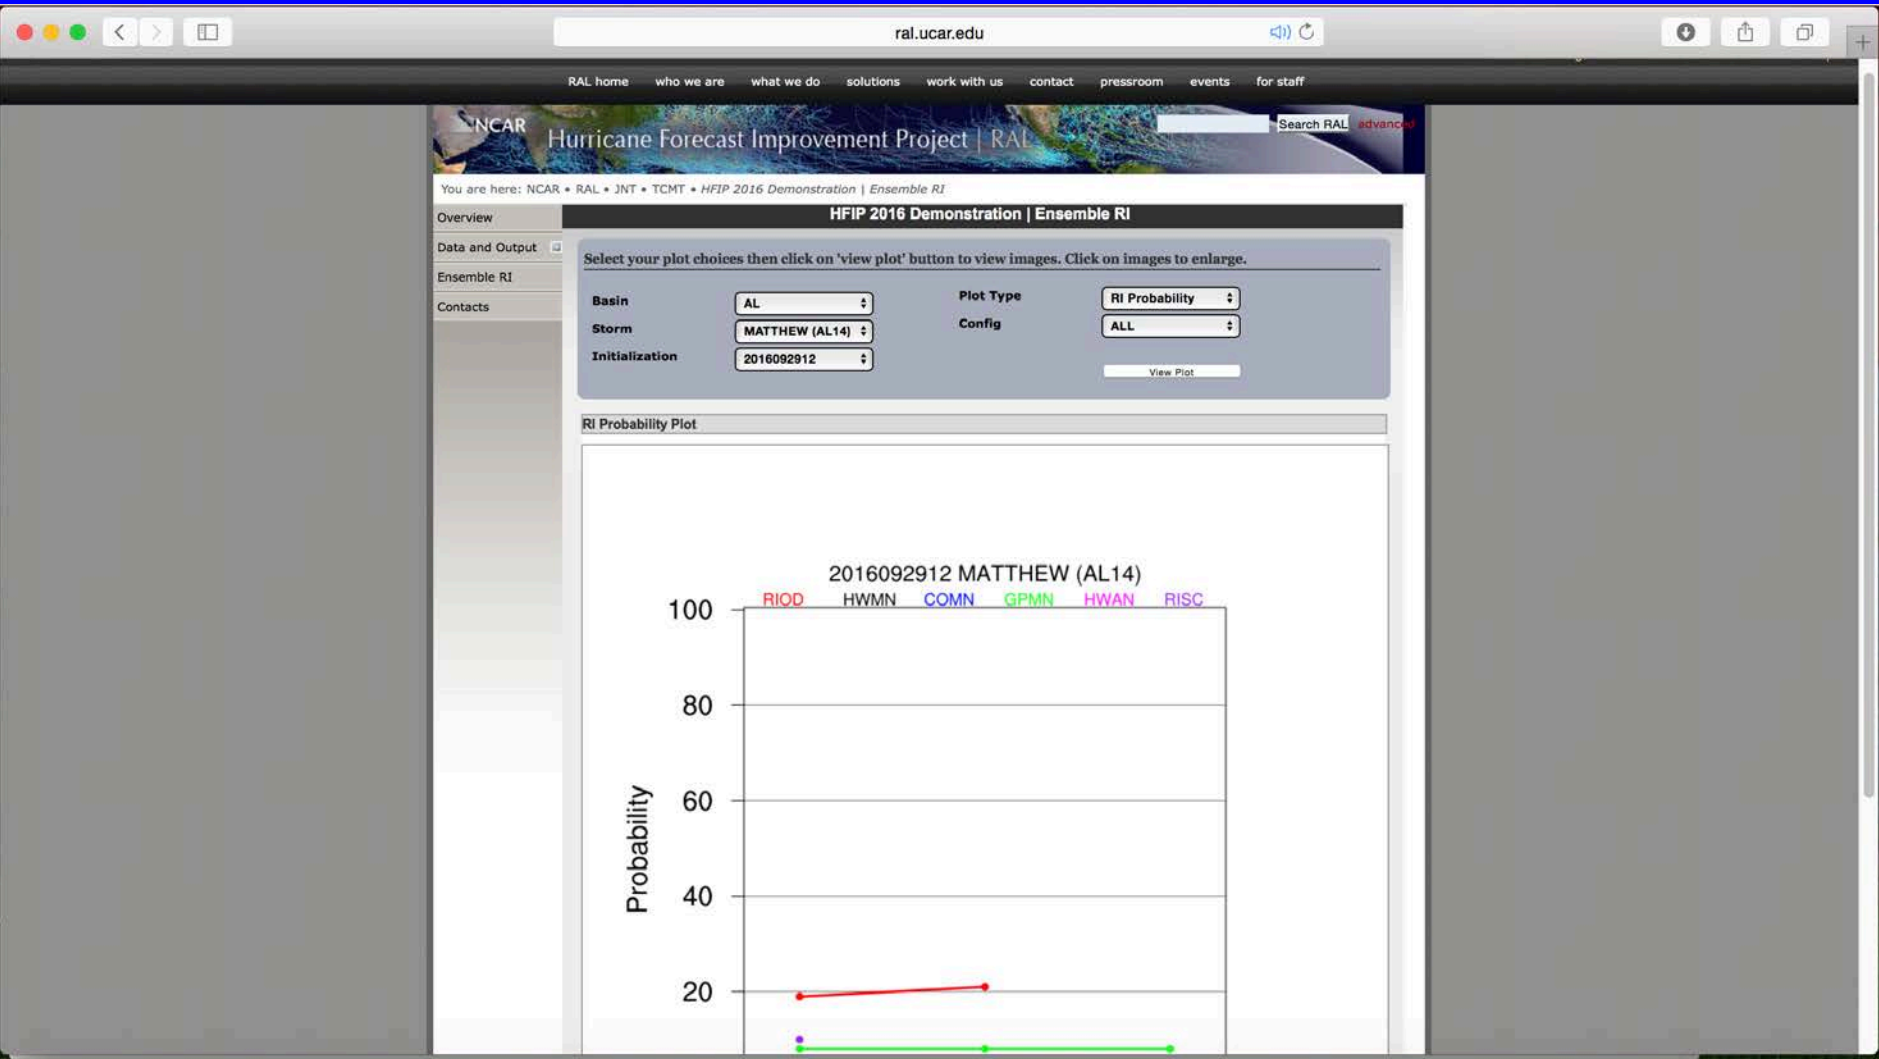

Contributions from various Ensemble
Forecasting Groups & NHC Forecasters

Overview

- **Charge:** Develop new ensemble-based products beyond the typical mean/standard deviation that could be used by NHC forecasters to improve forecasts
- For 2016: Develop an ensemble-based probabilistic RI product similar to the SHIPS RI product
 - HWRF Ensemble
 - GFDL Ensemble
 - COAMPS-TC Ensemble
 - SPCE
 - HWRF Analog

Accomplishments

- Extension of ATCF e-deck format to intensity change probabilities
- Software to compute probabilities and write e-decks
- Retrospective forecast probabilities submitted for AL & EP 2013-2015 seasons
- Expansion of MET-TC software to validate RI probabilities
- Validation of retrospective forecasts
- Submission of real-time ensemble-based probabilities to DTC for demonstration project
- Validation of demonstration forecasts
- Development of real-time webpage to plot probabilities

Matthew Example

00-24 h AL RI Reliability

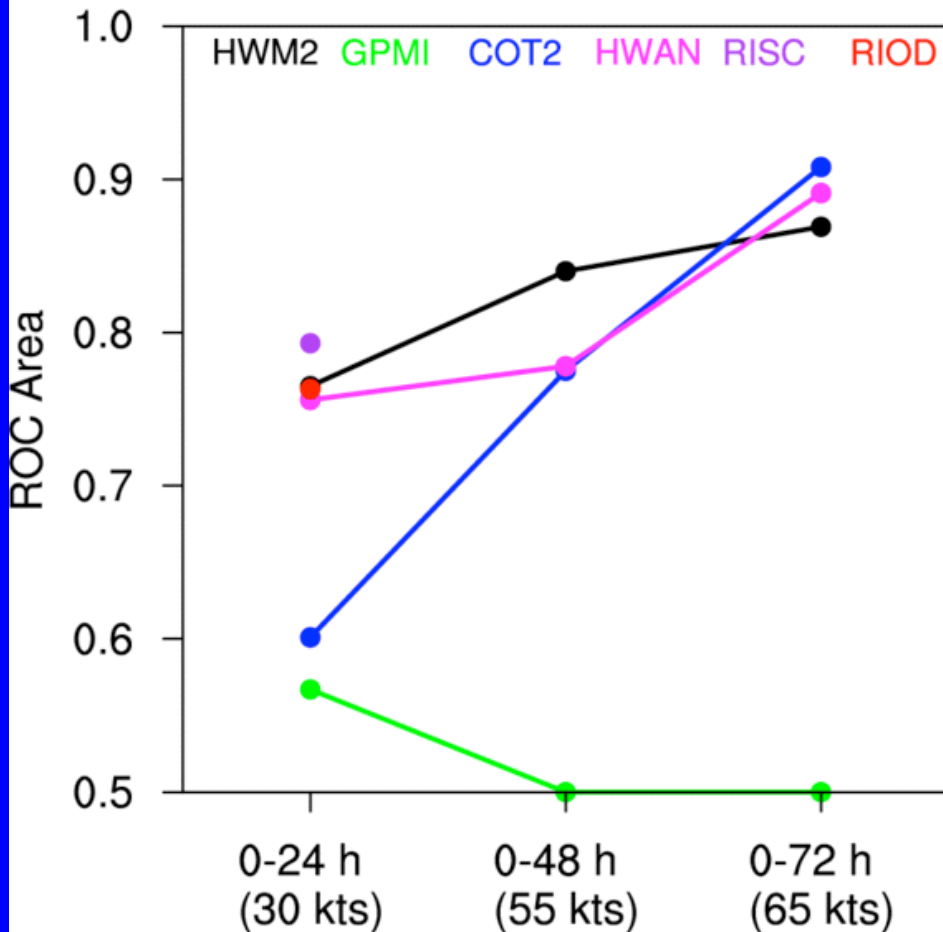

00-24 h RI ROC

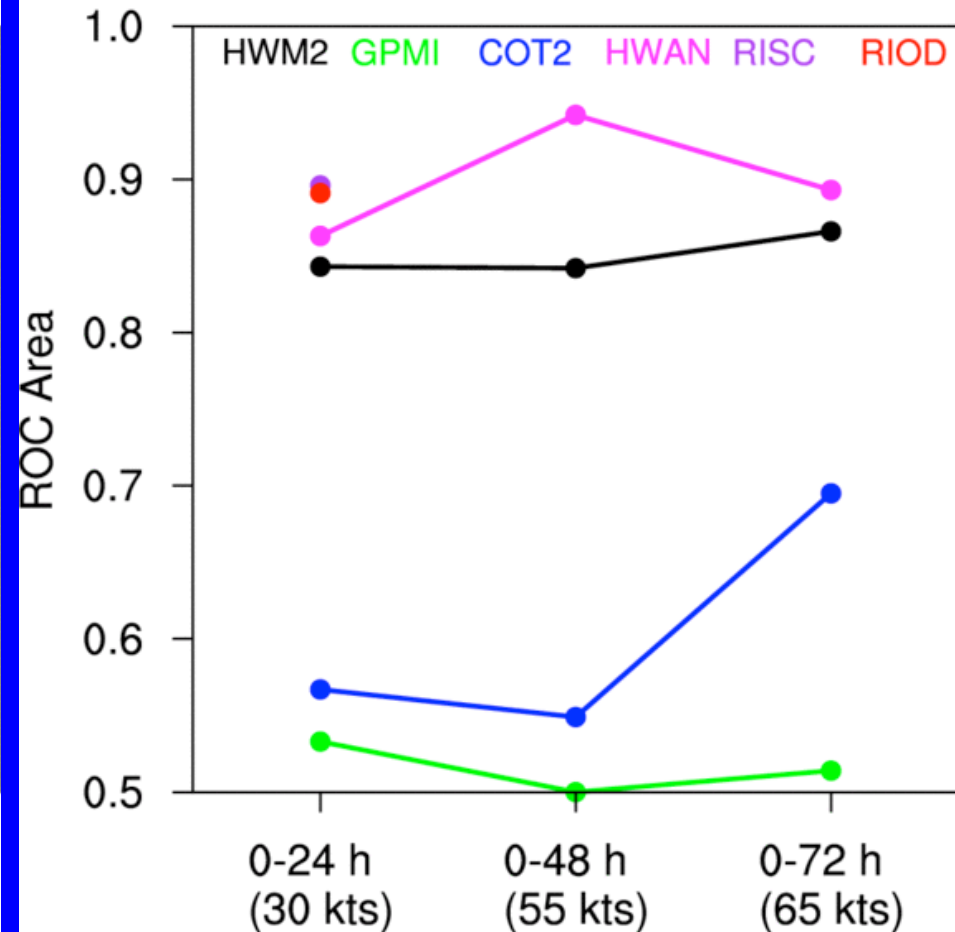

ROC Area Under Curve, Retro.

AL Retrospective (2013-2015)

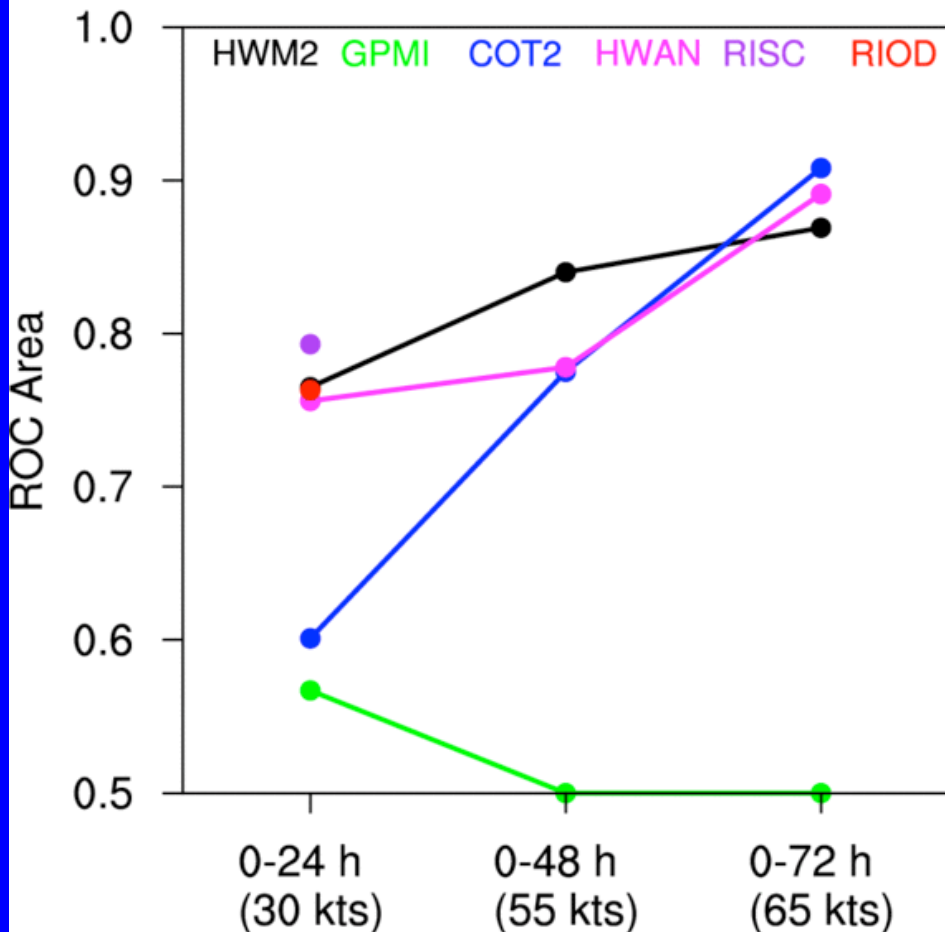

EP Retrospective (2013-2015)

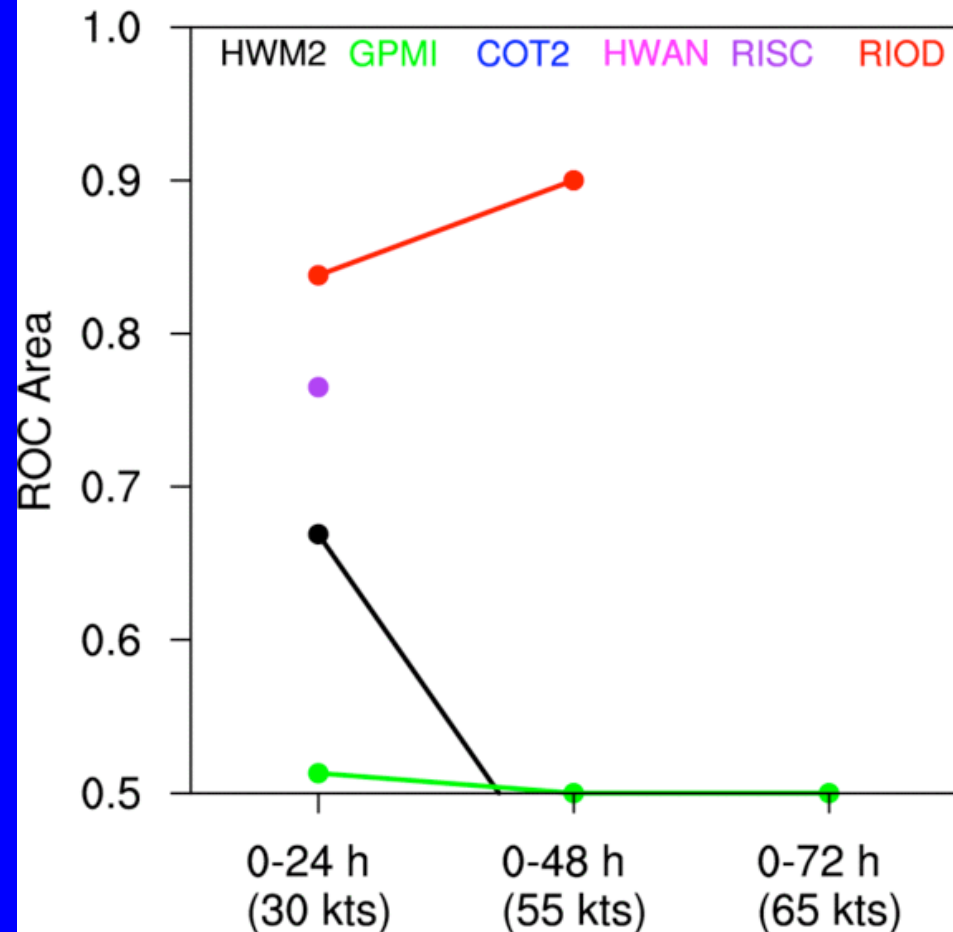

ROC Area Under Curve, Retro.

AL Retrospective (2013-2015)

2016 Demo. System

Future Directions

- In-depth validation of probabilities (ongoing)
- Increased Forecaster Participation
- Multi-system RI probabilities?
- Extending to other intensity categories
 - $\leq 30 \text{ kt } 24 \text{ h}^{-1}$
 - $30 \text{ kt } 24 \text{ h}^{-1} < \delta \leq -10 \text{ kt } 24 \text{ h}^{-1}$
 - $-10 \text{ kt } 24 \text{ h}^{-1} < \delta < 10 \text{ kt } 24 \text{ h}^{-1}$
 - $10 \text{ kt } 24 \text{ h}^{-1} \leq \delta < 30 \text{ kt } 24 \text{ h}^{-1}$
 - $\geq 30 \text{ kt } 24 \text{ h}^{-1}$

Multiple Category Example

HWMN 2016082700 GASTON (AL07)

00-24 h

24-48 h

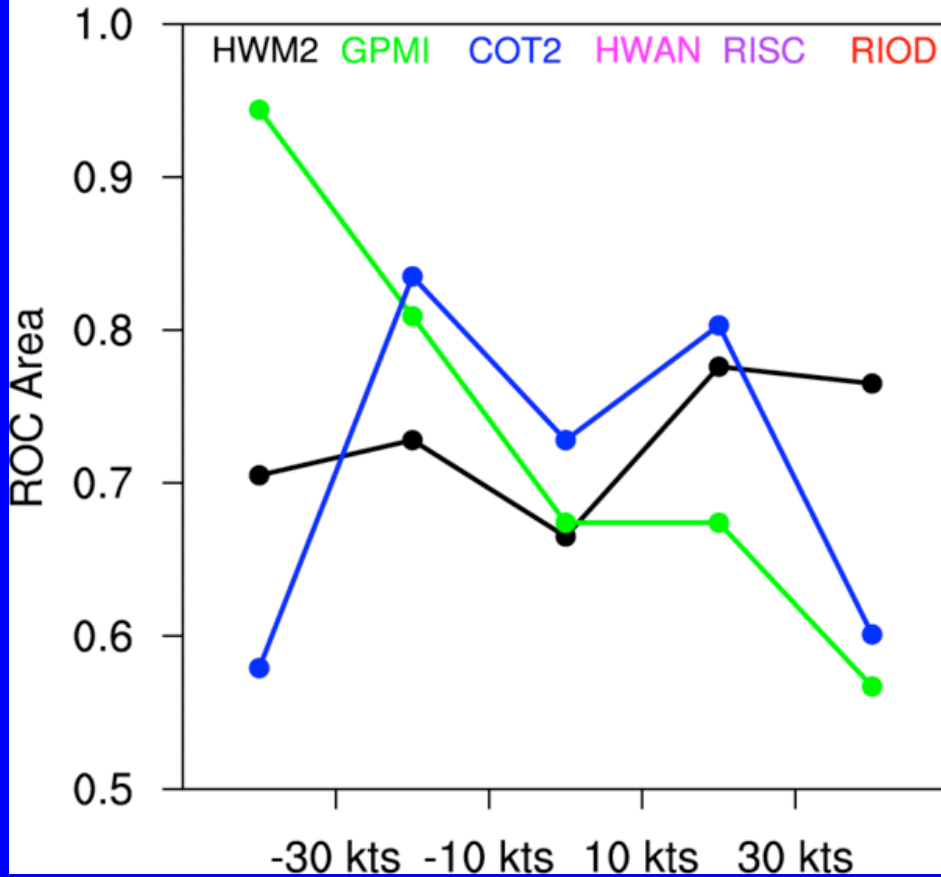

48-72 h

ROC Hourly

AL Retrospective F 24 (2013-2015)

AL Retrospective F 72 (2013-2015)
