

HAFS Project Coordination and Update (2/15/2019)

- EMC (Avichal) reported that both configurations- Andy's version of global with a nest and FV3 SAR are functionally running for the NATL basin.
- HAFS development efforts will be coordinated during the HFIP biweekly telecon.
- HAFS coordination meeting will be held once every other biweekly (monthly) on Wednesdays 2-3 pm ET where each organization will report on their progress.
- Prepared HAFS focus group list (email alias created) based on HSUP project plan primarily 3A-2 (HAFS) and other project plans directly affecting HAFS such as 1A-4 (moving nest), 4A-1/4A-2 (OSEs) and HFIP managers.
- Organizational updates by presentation will be open to the wider group including all contributors to HAFS Development and HSUP managers. Each org will present quarterly
- [Webpage for HAFS requested](#) (tab on hfip.org will be created) - task highlights, reports, presentations etc. ensuring transparency of the HAFS development progress.
